Subject: Communication of knowledge documents developed under the "Health Resilience and Capacity Building (HER-CAP)" project by NIDM in collaboration with WHO India-reg.

Dear Sir/ Madam,

Climate change is known to aggravate disasters by contributing to hazards and vulnerability. This leads to an increase in spread, intensity and complexity of health consequences. Government of India under National Action plan on climate change (NAPCC) has launched a National Climate Change mission on Human Health (NPUCHH). The National Institute of Disaster Management (NIDM), New Delhi has been designated as a Centre of Excellence by Ministry of Health & Family Welfare (MoHFW) for Disaster-Related Health Issues.

2. Looking to the serious implications of climate change on human health and recent experiences during COVID-19 pandemic, the context and outcomes of this project can be directly useful to central and state departments for various aspects of planning and development.

3. The "Health Resilience and Capacity Building (HER-CAP)" project has been implemented by NIDM with support from World Health Organisation India. Under this project, a National Health Adaptation Plan for Disaster-related Illnesses has been developed along with a Training Manual, Compendium of Case studies, policy papers and thematic papers etc. The documents were released on 15th September 2021 in an "Outcome Dissemination and Future Strategy Workshop". Therefore, these documents may be accessed via any of the following web links and may be referred to the relevant officials/institutions of the centre/ state.

- Training Manual - "Health Adaptation and Resilience to Climate Risks" - <https://tinyurl.com/y2ypdm4r>
- Compendium of Case Studies - "Health Adaptation and Resilience to Climate Change and Related Disasters" - <https://tinyurl.com/yat285t>
- Thematic Papers -
 - "Water-related Disasters (Floods & Drought) Implications for Health Adaptation & Resilience" - <https://tinyurl.com/3pavvz25>
