| | <p>Organisation of training/ workshops</p> | <p>ISBD is the largest thematic conference on Bipolar disorder, one of the severe and most researched mental disorders currently. The current conference was the 16th Annual conference of the society and was attended by over 900 delegates from more than 30 countries working in the field of this disorder. The sessions were spread over 4 days and included key-note lectures, 6 pre-conference courses, 32 symposia, 9 brainstorming sessions, 23 rapid communications, 200 international posters. The conference was attended by some of the eminent researchers in this field and presented their own views and research findings.</p> |
| | <p>Academic highlights of the conference, including major recommendation and the following: i. New development presented at training and workshop ii. New development resulting from training and workshop iii. Name of publication, in case your work is recommended for publications</p> | <p>The conference was focused on bipolar disorders. The conference highlighted clinical and research activities on bipolar disorders, from diagnosis to treatment, from basic research to psychosocial rehabilitation, from children to late life. Working with patients and their families to overcome the burden of bipolar disorder was an important theme. The abstracts of the conference were published in supplement of Bipolar Disorder Journal which is a highly reputed and has high index factor among the psychiatry journals.</p> |
