V.S.

There has been, over a period of time, a phenomenal increase in the use of computers, smart phones and internet. With enhanced use of technology for day to day activities, possibility of cyber crimes is also increasing. Common types of cybercrime include email spoofing, malicious files applications, cyber bullying, job frauds, banking frauds, etc.

As part of an initiative to spread awareness about various types of cybercrimes prevalent in the country, the Ministry of Home Affairs has brought out 'A Handbook for Adolescents/Students on Cyber Safety'. The information provided in this handbook is intended to create awareness among citizens especially students about various cyber threats that can impact them and ways to safeguard themselves against cyber crimes. 10 copies of the said handbook are attached. Soft copy of this handbook is available on www.cybercrime.gov.in and www.mha.gov.in

I would, therefore, request you to kindly give wide publicity in your organization; and institutions or attached/subordinate offices under your control, to share the said handbook to help children/adolescents to protect themselves.

Your kind cooperation is requested.

With regards
