NIAS/DST/PSSP/2018
30 October, 2017

Dear Dr. Soumya Swaminathan,

The National Institute of Advanced Studies (NIAS) is a vision of JRD Tata to create leaders for the nation in Government, private and public sectors and carry out trans-disciplinary research in the areas of high relevance to the Nation. All our programmes are intertwined with realization of synergy of disciplines and thus creating the desired impact with unique contributions. As part of its outreach programme, NIAS conducts residential courses every year for persons in senior positions in the government and industry. The main aim of these courses is to acquaint the participants with current developments in science, technology and policy and their overarching scientific, social and policy dimensions.

The Department of Science and Technology (DST), Government of India has been supporting NIAS to conduct these courses. For the sixth successive year, a Programme meant exclusively for Directors and potential Directors of Scientific Establishments in India is being organized in NIAS. This year, as in the previous year 2016, the theme of the programme is 'Policy for Science and Science for Policies'. The Course will be conducted during January 01-05, 2018. It is a fully residential course and the participants will be provided guest house accommodation on campus. Local hospitality will be provided by NIAS.

Our courses consist of interactive sessions with distinguished faculty drawn from organisations of repute in the country. I have great pleasure in requesting you to nominate not more than three senior scientists / officers (with at least 20 years experience) to attend this course. Professionals currently managing large scientific establishments / programmes in the country would benefit from this programme. Needless to say therefore we would prefer the nominees to be senior professionals in the organization. **Your organization will have to bear the cost of travel to Bangalore and back.** We would greatly appreciate receiving your nominations by 30th November, 2017 in the enclosed (nomination and biodata) formats. Participation in this course is limited to 25 based on a review and selection process as per the guidelines given by DST.

For more details about the course please contact Prof. Sangeetha Menon or Dr Nithin Nagaraj (Course Coordinators) or Ms. S Lalitha (Admin. Coordinator). The contact email id is (niaspssp.dst@gmail.com).

Looking forward to having your active support in conducting the course and making it a success and great experience.

With my best wishes and personal regards,

Dr. Soumya Swaminathan

NIAS-DST Training Programme on "Policy for Science and Science for Policies" for Directors, Divisional Heads, Chief Scientists and Senior Scientists

January 01-05, 2018

The National Institute of Advanced Studies (NIAS) has been organizing with support from the Department of Science and Technology (DST), Government of India, training programmes to provide the orientation and planning skills required for scientists and technocrats of the country, and in particular, to offer views of the broader scientific, economic, social and cultural milieu in which the Indian scientific enterprise could develop in this century. The large pool of scientific and technical manpower in many Indian institutions has not had the benefit of either induction training or a system of regular in-service training that are available to other cadre-based services. In order to bridge this gap, this Programme which is now sixth in the series for scientist-administrators and technologists at the Directors, Divisional Heads, Chief Scientists and Senior Scientists position from various scientific organisations in the country will focus on the theme 'Policy for Science and Science for Policies'. The Course will be conducted during January 01-05, 2018. Consistent with the mission of NIAS, its courses emphasize the development of leadership qualities through the integration of multidisciplinary knowledge.

About the Training Programme:

The training programme includes several technical lecture sessions (including the Inaugural and Valedictory function), and cultural programme. There will be a session on 'Yoga' practice in the mornings. The defining feature of the NIAS courses is the interactive session with distinguished faculty drawn from different organisations and occupations. The general format is a presentation for 45 minutes followed by lively discussions for 45 minutes. The participants will be encouraged to interact in depth as much as possible with the speakers.

The programme will draw speakers from across the nation to address some of the following topics:

- Science and Technology Policies
- Information Technology & Society
- Science Policy and Security
- Science Policy, Education and Culture
- Energy Policies & Climate Change
- Open Pharma & Drug Policies

More information about the lectures will be provided to the nominated participants.

About NIAS Infrastructure

Situated on five acres of land within the verdant campus of the Indian Institute of Science, the buildings of NIAS have a strikingly distinctive architecture with elegant lines and arched corridors.

The fully furnished guest rooms make the visitors' and course participants' stay a pleasant one. NIAS organises a variety of programmes and public events.

The campus of NIAS is often admired for its peaceful and green environs, an atmosphere conducive to research.

The facilities of NIAS include: JRD Tata Auditorium, Lecture Hall, Conference Hall, Guest Rooms and Green House for open air activities. These facilities are used from time to time for various activities of the Institute and when they are not being used by the Institute it is available for others. Architecture of the auditorium blends harmoniously with the main building and has the following facilities. The faculty block of NIAS has a lecture hall with a seating capacity of 100 and a conference room. The Institute has 30 fully equipped residential rooms along with a common dining hall and lounge, capable of accommodating 60 people at a time.

NIAS has unique infrastructural facilities like a furnished guest house, dining hall, library, auditorium lecture hall, rest rooms, internet browsing centres, and in whole a campus with good ambiance. Since the programme is residential, NIAS will arrange boarding and lodging facilities. In view of this guideline, it is necessary that all the participants stay in the campus.

Nominations

The Course participants will be drawn from various institutions like DST, DRDO, DAE, ISRO, ICMR, ICAR, CSIR, DSIR and Universities. No participation fee is involved for attending this residential programme. The travel expenses from the office Headquarters to Bangalore and back are to be met by the nominating organisation as stipulated by DST. Participation in this Programme is limited to 25 individuals.
