

The National Heart, Lung, and Blood Institute (NHLBI) and the National Institute of Neurological Disorders and Stroke (NINDS), in collaboration with the Global Alliance for Chronic Diseases (GACD), invite applications in response to the following Funding Opportunity Announcement (FOA): **Late-Stage Implementation Research Addressing Hypertension in Low- and Middle-Income Countries: Scaling Up Proven-Effective Interventions (UG3/UH3 - Clinical Trials Optional) RFA-HL-20-005.**

The purpose of this FOA is to support late-stage implementation research that focus on optimally and sustainably scaling up evidence-based interventions at the population level for prevention and management of hypertension in low- and middle-income countries (LMICs) and small island developing states (SIDS). As a group, awardees will constitute a research alliance for hypertension implementation science research in low-resource settings with capabilities for addressing scale-up of evidence-based interventions at the population level for the prevention and management of hypertension.
